

# TOTAL CONTROL

Remove.  
Replace.  
Isolate.

## Prioritise above the line controls.

- Plan work so that mobile plant is not required on site.
- Schedule work so plant and people are not working in the same area at the same time.
- Plan work to remove or limit the need for plant to operate in reverse.
- Use physical barriers to isolate plant/people interactions.
- Use engineering controls such as cameras and proximity detection devices.
